The global Antistatic Nylon Sheet market size is predicted to grow from US\$ 745 million in 2025 to US\$ 1010 million in 2032; it is expected to grow at a CAGR of 4.5% from 2026 to 2032.

In 2025, the global production of antistatic nylon sheets was approximately 112,000 tons, with an average selling price of around US\$6,800 per ton. Single-line production capacity is approximately 3,000-6,000 tons per year, with an average gross profit margin of about 15-25%. Antistatic nylon sheet is an engineering plastic sheet made from a nylon base material modified by adding carbon-based fillers. It possesses excellent mechanical properties (high strength, wear resistance, high temperature resistance) and stable, uniform antistatic properties, effectively preventing static electricity accumulation. It is widely used in precision industries such as semiconductor and electronics manufacturing to produce trays, fixtures, and guide rails to protect sensitive electronic components.

The upstream core raw materials for antistatic nylon sheets mainly include nylon resin base materials (such as PA6, PA66), antistatic agents (carbon black, carbon fiber, permanent antistatic masterbatch, etc.), and reinforcing materials such as glass fiber. Its downstream applications are widespread in industries with strict requirements for static control, including semiconductor and electronics manufacturing (such as wafer carriers, test fixtures), new energy vehicles (battery module components), food and pharmaceutical machinery, industrial automation, and textile printing equipment.

United States market for Antistatic Nylon Sheet is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Antistatic Nylon Sheet is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Antistatic Nylon Sheet is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
