Antistatic PTFE fabric is a type of fabric that is made from PTFE (polytetrafluoroethylene) fibers and has been treated to have antistatic properties. PTFE is a synthetic fluoropolymer that is known for its non-stick properties, high temperature resistance, and chemical resistance. Antistatic PTFE fabric is commonly used in industries where static electricity can pose a risk, such as electronics manufacturing, chemical processing, and cleanroom environments. The antistatic treatment applied to the fabric helps to dissipate static electricity and prevent the buildup of electrostatic charges.
