Any-layer HDI PCB is an HDI board made using Anylayer interconnect technology. Anylayer technology, as the name suggests, is an advanced manufacturing technology that enables connections between any two layers in a multi-layer printed circuit board (PCB). This technology not only breaks through the limitations of traditional HDI (high-density interconnect) technology in interlayer connections, but also greatly improves the integration and performance of circuit boards. Anylayer HDI technology allows designers to freely layout circuits within a limited physical space according to actual needs, thereby achieving more complex and efficient circuit designs.

The global Any-layer HDI PCB market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
