According to our LPI (LP Information) latest study, the global Aqua Ammonia market size was valued at US\$ 573.5 million in 2023. With growing demand in downstream market, the Aqua Ammonia is forecast to a readjusted size of US\$ 638.9 million by 2030 with a CAGR of 1.6% during review period.

The research report highlights the growth potential of the global Aqua Ammonia market. Aqua Ammonia are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Aqua Ammonia. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Aqua Ammonia market.

Ammonia solution, also known as ammonia water, ammoniacal liquor, ammonia liquor, aqua ammonia, aqueous ammonia, or (inaccurately) ammonia, is a solution of ammonia in water. It can be denoted by the symbols  $\text{NH}_3(\text{aq})$ . It is sometimes thought of as a solution of ammonium hydroxide. Although the name ammonium hydroxide suggests an alkali with composition  $[\text{NH}_4^+][\text{OH}^-]$ , it is actually impossible to isolate samples of  $\text{NH}_4\text{OH}$ . The ions  $\text{NH}_4^+$  and  $\text{OH}^-$  do not account for a significant fraction of the total amount of ammonia except in extremely dilute solutions.

Yara, CF, Shandong Everlast AC Chemical, Hangzhou Hengmao Chemical and DOW are the leaders of the Aqua Ammonia industry, which take about 25% market share. China is the major region of the global market, which takes about 35% market share.
