The global Aquaculture Premix market size is predicted to grow from US\$ 1707 million in 2025 to US\$ 2373 million in 2032; it is expected to grow at a CAGR of 5.0% from 2026 to 2032.

In 2025, global production of aquaculture premix (including both basic and compound premixes) reached approximately 881,200 metric tons, with an average selling price of around USD 1,980 per ton. Aquaculture premix refers to an intermediate feed product centered on vitamins and minerals, with optional incorporation of amino acids and selected functional nutritional components, and is added at low inclusion rates into industrial compound feeds for fish, shrimp, and crab. Serving as a critical link between basic nutrient supply and high-performance feed formulations, aquaculture premix plays an indispensable systemic role in ensuring animal health, growth efficiency, feed stability, and controllability in large-scale aquaculture operations.

At present, the overall aquaculture premix market has entered a relatively mature development stage, with demand closely aligned with global aquaculture output, feed industrialization levels, and the pace of formulation upgrades. Structurally, international nutrition companies and large feed groups dominate the mid-to-high-end segments, while regional suppliers maintain competitiveness through localized services and cost efficiency. In terms of trends, aquaculture premix is evolving from standardized supply toward greater species specificity and functional integration, with compound premixes accounting for a growing share of the total market, while remaining clearly differentiated from functional additives and animal health products. Market perspectives suggest that aquaculture premix represents a stable and resilient segment with clear technological pathways and rigid demand; although per-ton value growth is limited, long-term drivers such as higher farming densities, increasing feed formulation complexity, and stricter food safety and environmental requirements support sustained and predictable market expansion.
