The Farming or the culturing of aquatic animals like the fishes, algae, mollusks, crustaceans, aquatic plants and other aquatic organisms in different types of water is termed as Aquaculture. The cultivation process involves nurturing of these aquatic organism in the controlled condition either in fresh or in salt water. Later on these aquatic organisms are then harvested to be served as the source of nutrition or to be used for many other purposes. The aquatic animals are very sensitive and are prone to various epidemic diseases. Other factors affecting the aquatic cultured animals are Pathogens (e.g. bacteria, viruses, fungi and parasites) exist in all natural water bodies. At the same time crowded culture environment makes the causes high risk for infection and makes the fishes nervous. Crowding also results in fish knocking eventually leading to surface wounds which is a cause for inaction. These can be cured using several FDA

approved antibiotics and other medicines. Apart from diseases medicines are used to improve the wellbeing of the fishes in the aquaculture. The list of drugs includes chorionic gonadotropin, formalin solution, florfenicol, oxytetracycline, tricaine methane sulfonate, hydrogen peroxide, sulfadimethoxine/ormetoprim combination, acetic acid, calcium chloride, calcium oxide, carbon dioxide gas, fuller's earth, garlic (whole form), ice, magnesium sulfate, papain, potassium chloride, povidone iodine, sodium bicarbonate, sodium chloride, sodium sulfite, thiamine hydrochloride, urea and tannic acid. The above mentioned drugs take care of the aquatic animals fighting with several diseases which are not only harmful to the aquatic animals but are also harmful to the consumer. There are two different categories of diseases which affect the aquatic population viz. diseases due to pathogens which are indigenous to the local environment and exotic pathogens.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs.
