According to this study, the global Aquaponics Hydroponics Systems market size will reach US\$ 557 million by 2031.

Aquaponics refers to any system that combines conventional aquaculture (raising aquatic animals such as snails, fish, crayfish or prawns in tanks) with hydroponics (cultivating plants in water) in a symbiotic environment. In normal aquaculture, excretions from the animals being raised can accumulate in the water, increasing toxicity. In an aquaponics system, water from an aquaculture system is fed to a hydroponic system where the by-products are broken down by Nitrifying bacteria into nitrates and nitrites, which are utilized by the plants as nutrients, and the water is then recirculate back to the aquaculture system.

Global Aquaponics key players include Nelson and Pade, Aquaponic Source, Backyard Aquaponics, Aquaponics USA, Gothic Arch Greenhouses, etc. Global top five manufacturers hold a share about 50%. North America is the largest market, with a share about 70%, followed by Asia-Pacific and Europe, total with a share about 20 percent. In terms of product, DWC is the largest segment, with a share about 40%. And in terms of application, the largest application is Construction, followed by Family, Academic, and Commercial, etc.
