Aramid is a super engineering plastic with excellent hardness and heat resistance and Toray’s aramid film mictron® is the only commercially available aramid film in the world. Based on this technology, the company employed its proprietary polymer design and membrane forming technology and developed the colorless and transparent aramid film with high hardness and heat resistance.

Further, it treated the surface of the clear aramid film with specially designed process to realize ultra-high hardness of 9H and bending resistance that can withstand bending of more than 1 million times at a bending radius of 1 mm. Using this film as cover window is expected to realize thin and highly designable flexible display with scratch-resistance as good as glass.

The global Aramid Film market size is projected to grow from US$ million in 2024 to US$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
