Arborist throw bags and throwlines are essential tools used in tree care and climbing operations. A throw bag is a small, weighted bag filled with materials like sand or pellets, designed to be thrown accurately into tree branches or high locations. Attached to the throw bag is a throwline, a lightweight, durable rope that allows climbers to pull heavier rigging lines or climbing ropes into position once the throw bag is secured. This equipment enhances safety and efficiency in arborist tasks, enabling professionals to set up their climbing systems or rigging points without the need for ladders or additional equipment, thus facilitating access to high branches and improving overall productivity in tree maintenance and removal operations.
