Architectural lighting design is a field within architecture, interior design and electrical engineering that is concerned with the design of lighting systems, including natural light, electric light, or both, to serve human needs.

With the presence of several international and regional vendors, this market appears to be diversified. The regional vendors are finding it difficult to compete with the international vendors especially in terms of quality, technology, and price. The market is competitive and vendors are focusing on entering into strategic partnerships to gain and improve their market shares. The competitive environment in this market is further expected to intensify with an increase in product and service extensions, technological innovations, and M&A.
