An armored personnel carrier (APC), also known as an armored combat vehicle, armored car, or infantry mobility vehicle, is an armored vehicle designed to carry troops and equipment into the battlefield. APCs weigh less than the infantry fighting vehicles and main battle tanks and hence are more mobile. Unlike the infantry fighting vehicles (IFV), APCs do not participate in the direct-fire battle and are primarily designed for transport. However, they are lightly armed for self-defense and are armored for protection against shrapnel, small arms, and artillery fire. Furthermore, certain types of APCs are used by non-military organizations as well.

According to the 2022 global military expenditure statistics report released by the SIPRI, global military spending in 2022 maintained growth for the eighth consecutive year, an

increase of 3.7% compared with 2021, reaching \$2.24 trillion. The United States had the largest military expenditure in the world, with a size of \$877 billion, accounting for 39% of the world's total military expenditure. China and Russia were second and third, respectively. Ukraine's defense spending increased by 640% in 2022, making it the 11th largest defense spender in the world. The UK had the highest defence spending in Central and Western Europe at \$68.5 billion. France, South Korea and Japan also rank among the world's top 10 defense spenders.
