Articulated mining truck tires are off-road (OTR) engineering machinery tires specifically designed for articulated mining dump trucks (ADTs). Primarily used in complex working conditions such as mines, they feature high load-bearing capacity, excellent grip, and wear and cut resistance. They typically employ a radial construction and are equipped with E3 or E4 tread patterns to adapt to various operating environments such as mud, gravel, and rock. These tires are mainly available in sizes such as 26.5R25 and 29.5R25, emphasizing stability and durability on unpaved roads. They are one of the key wear-prone components for achieving efficient transportation and safe operation of articulated mining trucks. Their prices vary considerably depending on size and operating condition, with mainstream sizes (such as 26.5R25 and 29.5R25) typically costing between \$1,000 and \$5,000 per tire.
