Artificial grass yarns are synthetic fibers designed to replicate the look and feel of natural grass, used primarily in the production of artificial turf. These yarns are typically made from durable materials like polyethylene, polypropylene, or nylon, which provide resilience, UV resistance, and a realistic appearance. They are manufactured in various colors, thicknesses, and textures to suit different applications, including sports fields, landscaping, and recreational areas. Advanced artificial grass yarns are engineered for optimal performance, offering features such as improved softness, reduced shine, and enhanced wear resistance, making them a popular choice for low-maintenance, long-lasting grass alternatives.
