The global Artificial Marble Release Film market size is predicted to grow from US\$ 74.98 million in 2025 to US\$ 107 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

Artificial marble release film is an environmentally friendly release film, mainly used for artificial marble demoulding. In the production process of marble, the water-soluble film is placed inside the mold film, which can be demoulded quickly.

The main manufacturers of artificial marble release films in the global market include Kuraray, Aicello, Changchun Group, Ecopol, Guangdong Baodeli, etc., and the market concentration is relatively high. Leading companies control the majority of market share with mature technology and stable quality; small and medium-sized manufacturers seize niche markets with differentiated products and localized services. The increasingly fierce competition has prompted companies to increase R&D investment and upgrade product performance. From the perspective of downstream demand, as people's requirements for home environment continue to increase, artificial marble, as an environmentally friendly, beautiful and practical decorative material, is favored by more and more consumers, which will drive the growth of the artificial marble release film market.
