Artificial wave pools are engineered water attractions designed to generate waves, mimicking the natural ocean experience for surfing, bodyboarding, and recreational swimming. These pools use advanced technology and mechanical systems to create consistent and controlled waves of varying sizes and shapes, catering to different skill levels and activities. Popular in water parks, resorts, and surf parks, artificial wave pools offer a safe and accessible environment for water sports enthusiasts and the general public to enjoy wave riding without the need for coastal conditions. They are pivotal in expanding the reach of surfing and other wave-based activities to areas without natural surf, providing both entertainment and training opportunities.

United States market for Artificial Wave Pools is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
