Asset Inventory and Assessment Solutions refer to a category of software platforms and professional services designed to discover, inventory, normalize, correlate, assess, and continuously monitor an organization's digital and technology assets. The scope focuses on enterprise IT hardware, servers, endpoints, network devices, software licenses, SaaS applications, cloud resources, containers, workloads, domains, IP addresses, certificates, externally exposed assets, OT/IoT/IoMT devices, and CMDB configuration items. Typical product forms include SaaS platforms, on-premises software, discovery engines, cloud asset inventory modules, cyber asset attack surface management platforms, external attack surface management tools, OT passive discovery systems, managed assessment services, and professional advisory projects. Common technical approaches include agent-based discovery, agentless scanning, API-based ingestion, passive network monitoring, active probing, internet-wide scanning, asset fingerprinting, CMDB reconciliation, asset graph modeling, exposure scoring, and compliance mapping. These services help organizations establish an accurate, continuous, and auditable asset baseline that supports IT operations, cybersecurity, vulnerability management, Zero Trust programs, cloud security, software compliance, M&A due diligence, regulatory compliance, and enterprise risk governance.
