Autodesk channel partners work in conjunction with Autodesk to resell its products and services, often with customizations specific to each individual buyer. In addition to the value-added reselling of these tools, many Autodesk channel partners also offer implementation services. In situations where partners do not offer those services, buyers can utilize the services of companies that specialize in software implementation to assist with installation, training, and continued support. Tools like Autodesk 360 are used by architects, engineers, and structural designers to plan and model buildings and other structures. 3D modeling tools, such as Mudbox or Maya, can be utilized by those in the digital entertainment industry.
