Autogas is the common name for liquefied petroleum gas (LPG) when it is used as a fuel in internal combustion engines in vehicles as well as in stationary applications such as generators. It is a mixture of propane and butane.

In many countries autogas plays a significant role in transportation (sometimes also called LPG or GPL). In Germany for example there are already 6.000 autogas stations. Many public transportation or taxi companies have switched to autogas as an inexpensive and eco-friendly alternative. In warehouses many forklift trucks run on autogas.
