An automated swimming pool vacuum cleaner is a unit that runs from an outside power source rather than your pool's filtration system. It is sort of like a Roomba for your pool. They run on wheels or tank treads and have removable filter bags that you take out and clean after each use. Automated swimming pool vacuum cleaners work independently from the filter and pump and are driven by an electric motor inside the unit. They are self-contained, collecting debris in a filter canister within the cleaner. Automated swimming pool vacuum cleaners have built-in intelligence that ensures they don't get stuck in corners and on steps and provide better coverage than alternative cleaners.

The global Automated Swimming Pool Vacuum Cleaners market size is projected to grow from US\$ 735.6 million in 2023 to US\$ 1311.5 million in 2030; it is expected to grow at a CAGR of 8.6% from 2024 to 2030.

The spa industry continues to grow in terms of revenue and penetration across major economies in Europe, Asia Pacific, and North America. Commercial centers, shopping malls, hotels and fitness centers are increasingly adopting spa culture to increase daily foot traffic. They are also considered hubs of luxury destinations that attract foreign tourists. It's also become a major symbol of stress relief and sophistication, with top health spas offering bespoke wellness camps and treatments. Consumers seek spas to relax and relieve stress, with hot tubs and steam rooms high on priority. As spa facilities grow, so does the overall spa economy, which includes spa capital investment, spa education, spa media associations and events, and spa consulting.
