The global Automatic Hydraulic Button Tightening Machine market size is predicted to grow from US\$ 86.85 million in 2025 to US\$ 117 million in 2032; it is expected to grow at a CAGR of 4.4% from 2026 to 2032.

An automatic hydraulic button tightening machine is a mechanized device that uses a hydraulic system to power the rotation of the jaws via a hydraulic motor or cylinder, automatically tightening and loosening threaded connections such as drill pipe, casing, and sucker rod. It features high torque, precise control, stable operation, and high safety. This equipment is widely used in oil and gas drilling, well workover, and cementing operations, replacing traditional manual tongs and significantly improving the efficiency and consistency of threaded connections while reducing operational risks. It is a key piece of equipment for automating tubing handling in modern drilling and production engineering. Its upstream industry chain includes suppliers of high-pressure hydraulic pumps, servo valves, torque sensors, PLC control systems, and high-strength alloy structural components; the midstream consists of professional oil equipment manufacturers, requiring capabilities in fluid transmission design, explosion-proof electrical integration, and API 5DP/7-2 compliance verification; and the downstream primarily serves oil and gas companies such as CNPC, Sinopec, and CNOOC, as well as their service contractors. Due to their specialized industrial nature, high degree of customization, and strong technological barriers, the industry's overall gross profit margin ranges from 30% to 50% (up to 55% for high-end intelligent models). In 2024, the global production of automatic hydraulic screw fasteners was approximately 56,010 units, with a global average market price of approximately US\$1,524 per unit. Major companies in the industry have gross profit margins between 30% and 50%, with a single production line capacity of 2,000 units per year.

United States market for Automatic Hydraulic Button Tightening Machine is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Automatic Hydraulic Button Tightening Machine is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Automatic Hydraulic Button Tightening Machine is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Automatic Hydraulic Button Tightening Machine players cover ITH Bolting, WB Equipment, Plarad, Lapin, Wessely GmbH, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
