The global Automatic Nuts Roasting Machine market size is projected to grow from US\$ million in 2022 to US\$ million in 2029; it is expected to grow at a CAGR of % from 2023 to 2029.

The global automatic nuts roasting machine market is expected to grow at a steady pace in the coming years. The increasing demand for processed nuts, rising health awareness among consumers, and rapid urbanization are some of the key factors driving the growth of the market. Moreover, the growing popularity of snacking has led to an increase in the consumption of roasted nuts, further fueling the demand for automatic nuts roasting machines. Additionally, the advent of advanced technology, such as electronic temperature control, multi-batch roasting, and efficient energy use, has led to the development of high-performance and efficient roasting machines. Furthermore, the increasing number of food manufacturing companies and the rise in the adoption of automation technology in the food industry are expected to drive the growth of the market. However, the high cost of automatic nuts roasting machines and the availability of low-cost manual alternatives in developing markets may hinder the growth of the market. Overall, the automatic nuts roasting machine market is poised for significant growth in the coming years, with increasing demand from food manufacturers and consumers alike.
