Pallet stretch wrapping is a type of stretch wrapping which entails stacking of products on each other on the pallet and the assembly is wrapped. Machines used for pallet stretch wrapping are specialised machines that are used for handling and picking of pallet loads of variable weights and random heights. Goods are firmly wrapped in way that displacement of goods does not occur during transportation or shipment. Pallet wrapping machines are available in semi-automatic and automatic models. They are used in various industries such as consumer products, food and beverage, automotive, pharmaceuticals and textiles, to name a few.

Increasing customer demands for quality, speed and security across supply chains has driven optimization in packaging operations. Pallet stretch wrappers are new equipped with new features to meet consumer demands. End users require machines that can deliver efficient packaging, safe shipment and secure loads of varying types at enhanced efficiency. Pallet stretch wrapping machine is a unitizing equipment that requires minimal operator intervention. These machines are considered as critical packaging solutions from the beginning of the shipping process and logistics and not at the end of the packaging line.
