The global Automatic Roll Forming Machinery market size is predicted to grow from US\$ 564 million in 2025 to US\$ 756 million in 2032; it is expected to grow at a CAGR of 4.4% from 2026 to 2032.

Not only a automatic roll forming machinery can provide high quality products, but also decrease the human labour, time and increases the profit of business, thanks to the automation or continuous running. Other than roll forming, these machines perform a number of metalworking duties, including material cutting and roll punching.

Compared to regular metal fabrication equipment, like sheet metal press brake, metal sheet shearing machine, press machine, and straightening machine etc, a roll former line usually can do all the jobs, like bending, cutting, pressing for holes, straightening and even stacking.

China is the largest market for Automatic Roll Forming Machinery with a market share of about 21%, followed by North America with a market share of about 17%.

Due to China's rapid economic development in recent years, the amount of real estate infrastructure investment and development has continued to increase, and the demand for building materials has also continued to grow; in addition, with the development of the economy, China's per capita car ownership has continued to rise, and the automobile industry has developed rapidly, which has also increased the huge demand for roll forming machines.

Automatic Roll Forming Machinery is major applied in Automotive, Construction and Building Materials and other industries; Automotive segment is the largest application

area, with about 20% market share.

Key players include Gasparini SpA, Dallan S.p.a., CS-KSPAN, DREISTERN GmbH & Co. KG, FAGOR ARRASATE, Formtek (Mestek), ASC Machine Tools, Inc., Qualitech Machinery LLC, Dimeco and EWMenn GmbH & Co. KG; the revenue of top ten manufacturers accounts about 35% of the total revenue.

The world's advanced roll-forming machine technology is mainly controlled by companies in Europe, the United States, Japan and other countries. In recent years, Chinese manufacturers have caught up quickly and occupied a certain market share in the low-end market.

The roll forming machines market is currently witnessing several notable trends. One key trend is the increasing demand for customized solutions, as manufacturers seek tailored roll forming processes to meet specific production needs. Automation and the integration of advanced technologies, such as Industry 4.0 and IoT, are enhancing operational efficiency and precision, allowing for real-time monitoring and data analysis. The rise in demand for lightweight materials, particularly in the automotive and construction sectors, is also driving innovation in roll forming techniques. Additionally, sustainability is becoming a focal point, with manufacturers prioritizing energy-efficient designs and recyclable materials in their machinery. These trends are expected to fuel growth and innovation in the roll forming machines market.
