The global Automatic Wire Crimping Machine for Automotive Industry market size is projected to grow from US\$ 515.5 million in 2022 to US\$ 740.6 million in 2029; it is expected to grow at a CAGR of 5.3% from 2023 to 2029.

At present, the automatic wire crimping machine equipment on the market is mainly divided into two schools: European-style and Japanese-style equipment. European-style equipment is mainly oriented by functional equipment for automotive wiring harnesses and aimed at integrating the industry chain. It is characterized by large equipment structure, large maintenance space, high degree of modularization, strong functionality, and limited scope of application, but it is more popular in the automotive wiring harness industry. Major manufacturers include Komax, Schleuniger, etc. Among them, Schleuniger completed the merger with Komax at the end of August 2022, which further enhanced the market concentration. Japanese-style equipment companies continue to develop functional equipment for automotive wiring harnesses through technological advancement. It is characterized by compact structure, light weight, energy saving, high efficiency and wide application range. The main manufacturers are Japan Automatic Machine, ShinMaywa and so on. The market share of the top three companies exceeds 44%. In the future, as leading companies continue to expand the market, the market will become more and more concentrated.

A wire crimping machine is a device used to securely join or terminate electrical wires and connectors by creating a mechanical connection known as a crimp. It is commonly used in industries such as electronics, telecommunications, automotive, and aerospace.

Wire crimping machines are essential in manufacturing processes where reliable and efficient wire connections are required. They help to improve productivity, reduce labor costs, and ensure consistent quality in the assembly of electrical harnesses, cables, and connectors.
