The automotive AC compressor is a key element of the HVAC system. HVAC systems are widely accepted among all class of vehicles and across all regions, irrespective of climatic conditions. The AC compressor compresses the refrigerant, primarily R134a, and sends it to the condenser. The AC compressor is used for pressurizing the AC unit and keeping R134a flowing so that it can work properly. The AC compressor works in a constant on-off cycle. The conventionally used AC compressor is driven by the engine via a V-belt and pulley.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their
