The global Automotive Airbag Inflator market size is predicted to grow from US\$ 4153 million in 2025 to US\$ 5692 million in 2031; it is expected to grow at a CAGR of 5.4% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

An automotive airbag inflator is a device within a vehicle's airbag system that generates the gas needed to inflate the airbag during a collision. It activates within milliseconds when triggered by a crash sensor, allowing the airbag to deploy and provide a protective cushion for the occupants. The inflator plays a critical role in reducing injury severity by enabling the rapid and reliable deployment of the airbag.

The automotive airbag inflator market is witnessing continuous growth as safety becomes a central focus in the global automotive industry. Governments around the world are enforcing stricter safety regulations, making airbags a mandatory feature in both entry-level and premium vehicles. As a result, the demand for reliable and efficient inflators is expanding across all vehicle segments.

In addition to regulatory pressure, consumer expectations for advanced safety systems are pushing automakers to invest in improved inflator technologies. Modern inflators are not only designed for rapid deployment but also for reduced weight, minimized environmental impact, and compatibility with electric and autonomous vehicle architectures. The industry is also seeing increased R&D activity aimed at enhancing inflator performance, durability, and cost-effectiveness.

Moreover, collaborations between global automotive suppliers and airbag system manufacturers are strengthening the supply chain and accelerating innovation. As vehicles become more connected and automated, inflators will play a vital role in integrated safety systems that require precise and intelligent activation in various crash scenarios.
