## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

All season tires offer versatile performance and are designed to perform in a variety of conditions including wet roads and light winter driving. Likewise, an all season tire is not designed to handle extreme winter conditions like trekking through snow or driving on ice.

LPI (LP Information)' newest research report, the “Automotive All-season Tires Industry Forecast” looks at past sales and reviews total world Automotive All-season Tires sales in 2022, providing a comprehensive analysis by region and market sector of projected Automotive All-season Tires sales for 2023 through 2029. With a transparent methodology based on hundreds of bottom-

up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Automotive All-season Tires.

The global Automotive All-season Tires market size is projected to grow from US\$ 34650 million in 2022 to US\$ 44470 million in 2029; it is expected to grow at a CAGR of 44470 from 2023 to 2029.

The All Season tire classification is a compromise between one developed for use on dry and wet roads during summer and one developed for use under winter conditions. The type of rubber and the tread pattern best suited for use under summer conditions cannot, for technical reasons, give good performance on snow and ice. The all-season tire is a compromise, and is neither an excellent summer tire nor an excellent winter tire.
