The global Automotive Central Gateway Module market size is predicted to grow from US\$ 1392 million in 2025 to US\$ 1653 million in 2031; it is expected to grow at a CAGR of 2.9% from 2025 to 2031.

A gateway is a central router that securely and reliably interconnects and transmits data across multiple different networks within a vehicle. It interacts information between functional domains (powertrain, chassis and safety, body control, infotainment, telematics, ADAS) that share data through physical isolation and protocol transformation. Vehicles increasingly rely on electronic control units (ECUs) to enhance the driving experience. As a communication bridge between various ECU networks, gateway controller through the external interface (including high and low speed CAN, LIN, Ethernet protocol) to achieve data exchange, play a fundamental role.

At present, the market is relatively concentrated. Major global manufacturers include Robert Bosch, Continental, Denso and Lear Corporation, etc. The top five manufacturers account for more than 85.2%.
