The global Automotive Brake Assist System market size is predicted to grow from US\$ 386 million in 2025 to US\$ 535 million in 2032; it is expected to grow at a CAGR of 4.9% from 2026 to 2032.

Automotive Brake Assist System is a complementary system for the anti-lock braking system, used in case of an emergency where braking pressure is applied on the brake when the vehicle is about to crash. If the brake applied by the driver exceeds the set limit on ECU, the Brake Assist System gets alerts and applies additional force by ECU to achieve complete braking.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
