The growing applications for connectors in advanced safety systems in vehicles include Automotive Computer Controlled Systems (ACC), airbag, Electronic Stability Program (ESP), Intelligent Parking Assist System (IPAS), Tire Pressure Monitoring System (TPMS), Lane Departure Warning System (LDWS) and steering systems. The increase in safety concerns among consumers, coupled with the safety-related initiatives from government agencies has elevated the requirement for connector systems to integrate the safety systems. For instance, automotive safety systems used in seatbelts, airbags and brakes require a connection system comprising a retainer and safety restraint system connector. Aptiv PLC provides various safety restraint system connector solutions for airbags. Thus, the growing demand for automotive safety systems has a direct influence on the demand for automotive connectors, driving the market of the automotive connector systems.
