Automotive Hub Bearing perform two very important jobs in a vehicle's suspension. The wheel bearing allows the wheels to rotate with minimal function, and they also support the vehicle's weight. To be able to do both of these jobs, the bearings must be in near perfect condition. The seals must also be leak free to keep the lubricant inside the bearings and contaminants out. In an average sedan that weighs around 3,400 lb, each pair of front Hub Bearing, as well as the rear wheel or axle bearings, each support 850 pounds. This all depends on the front to rear weight distribution of the vehicle. It's a lot of weight that needs to be supported over tens of thousands of miles.

Due to the high sales of global automotive market, and the increasing demand for fuel efficient, the current demand for automotive hub bearings product is relatively high worldwide. Meanwhile, the demand from China market was much higher due to the rapid development of Chinese automotive market.

Because there are giant multinational players like SKF, Schaeffler, NTN and NSK in this market, the concentration of global automotive hub bearings market is relatively high. Among the top automotive hub bearings players, SKF, Schaeffler, NTN and NSK are the big five players in the world, and these four companies occupied about 56% revenue market share totally in 2017, Meanwhile, there are hundreds of small scale manufacturers all over the world.

In terms of bearings type, the first generation bearing is losing its place during last few years, meanwhile, the second and third generation bearings are more and more popular in the automotive market. The revenue market share of those three generation bearings are 12%, 44% and 39% respectively in 2017.

With the increasing sales of vehicles worldwide, the demand from automotive aftermarket has caught the attention of the automotive hub bearing manufacture

recently.

According to this study, over the next five years the Automotive Hub Bearing (Automotive Wheel Bearing) market will register a 5.3% CAGR in terms of revenue, the global market size will reach US\$ 8970 million by 2024, from US\$ 6590 million in 2019. In particular, this report presents the global market share (sales and revenue) of key companies in Automotive Hub Bearing (Automotive Wheel Bearing) business, shared in Chapter 3.
