An automotive HVAC blower is an important component of an automotive air conditioning system used to regulate the temperature and humidity of a vehicle by sending hot and cold air generated by the air conditioner through vents in the vehicle. It is usually driven by an electric motor that generates airflow through rotating blades and sends the air through ducts and vents to various areas of the vehicle, including the driver's and passenger compartments. Automotive HVAC blowers can adjust the airflow size and speed as needed to meet the passenger's needs for air conditioning comfort.
