The global Automotive HVAC System market size is predicted to grow from US\$ 14860 million in 2025 to US\$ 18203 million in 2032; it is expected to grow at a CAGR of 3.0% from 2026 to 2032.

Automotive HVAC (HVAC is abbreviation for heating, ventilation and air conditioning systems) is a system consisting of three sub-systems that all work together to provide conditioned air to the cabin. The heating part can raise the temperature inside the car using heat from the engine. The ventilation part moves and directs the air within the cabin. And the air condition part can remove the heat from the car by cooling and dehumidifying the air with a refrigerant.

The market for Automotive HVAC System is primarily driven by increasing consumer demand for in-cabin comfort, air quality, and climate control features. Rising global vehicle production, especially in emerging markets, expands the base of vehicles requiring A/C systems. The growth of electric vehicles (EVs) and hybrid vehicles further fuels demand, as these vehicles require energy-efficient, lightweight, and low-noise air conditioning solutions to optimize battery usage and overall vehicle performance. Stringent environmental regulations and fuel efficiency standards push manufacturers to adopt eco-friendly refrigerants and advanced heat pump technologies. Additionally, technological advancements such as automatic climate control, multi-zone temperature regulation, air purification systems, and integration with smart vehicle systems enhance user experience, driving further adoption of sophisticated automotive A/C systems across passenger and commercial vehicles.

The global key manufacturers of Automotive HVAC System include Denso, Valeo, Mahle, HanonSystems, SANDEN, AoteCar, Bergstrom, ESTRA Automotive, Highly

Marelli, Mitsubishi, etc. In 2025, the global top five players had a share approximately 54% in terms of revenue.
