The global Automotive Instrument Cluster and Head-Up Display (HUD) market size is projected to grow from US\$ million in 2022 to US\$ million in 2029; it is expected to grow at a CAGR of % from 2023 to 2029.

In OEM market, C-type will expectedly see a declining market share due to poor user experience, and even Chinese automakers use few HUDs of such type, for example, Geely equips its Borui models with W-type. AR-HUD is the general direction of OEM. To achieve AR (augmented reality) of the true sense, DLP (digital light processing) projection technology is indispensable. AR-HUD will come out in 2018 and be the mainstream in 2021. However, for digital micromirror device (DMD), the core component of DLP projector, and related technologies are monopolized by Texas Instruments, coupled with complicated optical path and much higher price of DMD than TFT-LCD, DLP's costs will seldom drop despite maturity of the technology for quite a few years.
