Abstracts

The global Automotive Liveness Detection System market size is predicted to grow from US$ 631 million in 2025 to US$ 924 million in 2032; it is expected to grow at a CAGR of 5.7% from 2026 to 2032.

In 2024, global automotive liveness detection system production reached approximately 941 K units , with an average global market price of around US$ 650 per unit.The automotive liveness detection system is an intelligent safety system installed in the automobile and used to detect and identify whether there is a living body in the vehicle. Its core goal is to solve the safety hazard of children or pets being left in the car due to human negligence, and to prevent living beings from entering dangerous areas under certain scenarios.

The annual production capacity of a single production line for automotive liveness detection systems is typically 5,000-7,000 units, with a gross profit margin of around 28%.

The downstream consumption of automotive liveness detection systems is as follows: commercial vehicles 25%, passenger vehicles 75%.

The core requirements of automotive living-body detection systems stem directly from the rigid guarantee of life safety in the vehicle, especially for the fatal risk caused by children or pets being left in the hot compartment. Its business opportunities are driven by two engines: one is the mandatory promotion of policies and regulations, and many authoritative new car safety evaluation agencies around the world have planned to include the rear passenger detection into bonus points or even mandatory requirements, which is rapidly promoting it to become the standard configuration of

middle and high-end new cars; the other is the awakening of safety awareness at the consumer end, providing key purchase decision points for family cars. The business opportunity lies not only in providing high-integration radar or sensor solutions for vehicle manufacturers, but also in the aftermarket, as well as in linking detection functions with air conditioning and alarm systems to form smarter "life protection solutions".

United States market for Automotive Liveness Detection System is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Automotive Liveness Detection System is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Automotive Liveness Detection System is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
