Automotive interior leather refers to a special type of leather, which is used to augment the ambiance and aesthetics of the vehicle interior. The quality of leather is different from ordinary furniture leather as its driver and passenger can feel its unique texture during their time inside the vehicle. Automotive interior leather is not limited to upholstery only and can cover controllers, steering wheel, and infotainment systems. Apart from being aesthetic in appearance, automotive interior leather is required to be durable and should sustain constant abrasions of scratches and wear & tear.
