The global Automotive Portable Refrigerators market size is predicted to grow from US\$ 569 million in 2025 to US\$ 1177 million in 2032; it is expected to grow at a CAGR of 11.0% from 2026 to 2032.

In 2025, global Automotive Portable Refrigerators production reached approximately 1.29 million units, with an average global market price of around US\$450 per unit.

An automotive portable refrigerator is a compact mobile refrigeration device designed for use in vehicles. It typically operates on 12V or 24V DC power supplied by the vehicle and uses compressor-based or thermoelectric cooling technology to store food, beverages, medicines, and other temperature-sensitive items. These refrigerators are lightweight, energy-efficient, and easy to install, allowing them to be placed in vehicle trunks, cabins, or camping equipment. They are widely used in road trips, RV camping, outdoor adventures, and long-distance transportation. With the growing popularity of outdoor lifestyles and self-driving travel, automotive portable refrigerators have become an important category of mobile refrigeration equipment and automotive lifestyle electronics.

The upstream segment of the automotive portable refrigerator industry includes suppliers of compressors, refrigerants, insulation materials, electronic controllers, power management modules, and plastic or metal structural components. The midstream consists of manufacturers responsible for product design, refrigeration system integration, temperature control development, and final assembly of portable refrigerators. Downstream applications mainly include passenger vehicle users, RV and off-road vehicle modification companies, outdoor equipment brands, and logistics operators. Representative upstream suppliers include compressor manufacturers such

as Secop, Embraco, Huayi Compressor, and Danfoss, as well as insulation and engineering material providers such as BASF and Covestro. Midstream manufacturers include well-known brands such as Dometic, Engel, ARB, Indel B, and Alpicool. Downstream markets include vehicle modification sectors associated with brands such as Toyota, Ford, and Mercedes-Benz, along with RV manufacturers, outdoor equipment suppliers, and road-trip consumers. The overall ecosystem integrates refrigeration component supply, equipment manufacturing, and automotive and outdoor lifestyle applications.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022. The car portable refrigerator is a small mobile refrigerator powered by a car. When traveling, it is best to take drinks, food and medicines with you. Popular features of this product are its portability and light weight. Rising enthusiasm for outdoor leisure activities among millennials across the globe owing to rising fitness awareness among people is expected to boost usage of portable mini refrigerators to keep food and beverages fresh. Moreover, growing demand for portable compact refrigerators in personal vehicles and recreational vehicles (RV) among adventure enthusiasts is expected to boost the usage of various portable mini refrigerators in the coming years. The demand for portable mini refrigerators has been driven by the participation of consumers of various age groups in outdoor leisure activities such as outings, picnics, camping, hiking, adventure road trips, etc. over the past few years. These mini fridges are compact, lightweight and consume little energy, making them ideal for storing food, drinks and even medicines when traveling outdoors. The aforementioned advantages are increasing the adoption rate of portable mini refrigerators among buyers. 40.5 million citizens in the United States participate in camping as an outdoor activity. People prefer to camp in RVs, tents and cabins, and these portable mini fridges play an important role in keeping all kinds of food and beverages fresh. Furthermore, growing importance of mobile homes and micro homes due to shifting attention towards luxury

and convenience during adventure travel such as camping, is expected to expand the range of portable mini refrigerators.
