According to our LPI (LP Information) latest study, the global Automotive Powertrain market size was valued at US\$ million in 2023. With growing demand in downstream market, the Automotive Powertrain is forecast to a readjusted size of US\$ million by 2030 with a CAGR of % during review period.

The research report highlights the growth potential of the global Automotive Powertrain market. Automotive Powertrain are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Automotive Powertrain. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Automotive Powertrain market.

Automotive powertrain also called the power plant, consists of those parts or components that conduct the vehicle's power from the original source of energy to the surface of the road. In most modern vehicles, the powertrain includes the engine, transmission, drive shaft, differentials and what is known as the final drive.

In automotive terms, the powertrain (also frequently called the 'running gear' in this context), combined with the frame of the vehicle, forms the chassis. When the engine and transmission are removed from the powertrain, the remainder is what the automotive industry commonly refers to as the driveline or drivetrain.

Automotive Powertrain is a system of mechanical parts in a vehicle that first produces

energy, then converts it in order to propel it, whether it be an automobile, boat or other machinery. The basic Components it may include are?

- Engine
- Transmission
- Drive Shafts

The major players in United States Automotive Powertrain market include General Motors, Toyota, etc. The top 2 players occupy about 30% shares of the whole market. Gasoline Powertrain System is the main type, with a share about 70%. Passenger Car is the main application, which holds a share about 75%.
