The global Automotive Rubber Bonnet Latch market size is predicted to grow from US\$ 288 million in 2025 to US\$ 415 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

In 2025, global sales of Automotive Rubber Bonnet Latch reached 168 million units, with an average selling price of US\$1.75 per unit. Automotive Rubber Bonnet Latches are automotive fasteners that utilize highly elastic rubber materials and metal connecting components to secure, cushion, and dampen the engine hood. They are widely used in passenger cars, commercial vehicles, SUVs, engineering vehicles, and racing car modifications. This product uses the elastic tension of the rubber body to firmly lock the hood, effectively reducing the risk of hood shaking, abnormal noises, and accidental opening caused by vibrations, bumps, or high-speed airflow during vehicle operation. It also features shock absorption, dustproofing, weather resistance, and easy installation. The product typically consists of EPDM rubber, natural rubber, silicone rubber, stainless steel hooks, galvanized steel fasteners, and a plastic base, and different locking forces and installation methods can be designed according to the vehicle structure. Global total production capacity in 2025 was approximately 195 million units, with industry gross margins remaining between 21% and 36%. The upstream sector mainly involves suppliers of rubber raw materials, steel, fasteners, surface treatment materials, and molds, while the downstream sector primarily supplies automakers, auto parts manufacturers, the aftermarket, and after-sales service channels. Passenger vehicles account for the largest share of consumption, followed by off-road vehicles, pickup trucks, and engineering vehicles.

With the growth of global car ownership, the popularization of off-road and modification culture, the increasing demand for lightweight new energy vehicles, and the rising

requirements for vehicle NVH performance, the automotive rubber hood lock market maintains stable growth. High weather resistance, long lifespan, lightweight, and integrated locking products will become the future development direction. Meanwhile, the expansion of the automotive modification market and the development of the automotive industry in emerging countries will continue to bring new market opportunities.
