## Abstracts

The global Automotive Silicone Booster Hose market size is predicted to grow from US\$ 2342 million in 2025 to US\$ 3790 million in 2032; it is expected to grow at a CAGR of 7.2% from 2026 to 2032.

In 2025, global sales of Automotive Silicone Booster Hose reached 128 million units, with an average selling price of US\$18.7 per unit. Global total production capacity in 2025 was approximately 165 million units, with industry gross margins remaining between 24% and 31%. Automotive Silicone Booster Hoses are high-performance connecting components used in turbocharging systems, intercooling systems, and engine intake systems. They are primarily manufactured using materials such as silicone rubber, polyester fiber reinforcement layers, stainless steel clamps, and aramid fibers, possessing high temperature resistance, high pressure resistance, aging resistance, and oil resistance. They can operate stably for extended periods in environments ranging from -50° to 260° and are widely used in thermal management systems for passenger cars, heavy trucks, construction machinery, and new energy vehicles.

Upstream suppliers mainly involve chemical and metal material suppliers such as methyl vinyl silicone rubber, silica, glass fiber reinforcement materials, steel strips, and additives. Downstream suppliers primarily supply OEMs, engine manufacturers, the aftermarket, and new energy vehicle thermal management system integrators. The passenger car sector accounts for the largest share of consumption, followed by commercial vehicles and the high-performance modification market. With the increasing global penetration rate of turbocharged engines, the upgrading of thermal management systems for new energy vehicles, and the tightening of emission standards for commercial vehicles, the market demand for automotive silicone turbocharger hoses

continues to expand. High-end multi-layer composite silicone hoses, lightweight high-temperature resistant products, and customized assembly solutions are becoming the main business opportunities in the future.
