The global Automotive Solar Control Glass market size is predicted to grow from US\$ 1385 million in 2025 to US\$ 1876 million in 2031; it is expected to grow at a CAGR of 5.2% from 2025 to 2031.

Solar control glass is specially treated glass which is designed to keep car interiors comfortable by preventing the buildup of solar heat.

Solar control glass is not necessarily coloured or mirrored glass, although such finishes can be applied for aesthetic purposes if desired. It incorporates invisible layers of special materials on the glass which have the dual effect of allowing sunlight in, while repelling solar heat. Solar control glass units are typically doubleglazed, which means they also insulate well.

Market competition is intense. NSG, AGC, Saint Gobain, Guardian Glass, AIG, XINYI, PPG, SYP Glass are the leaders of the industry, with about 88% market shares.

Europe is the largest consumption place, with a consumption market share nearly 37%. Following Europe, North America is the second largest consumption place with the consumption market share of 27%.
