Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022. Gearbox is an integral part of every car and is an important driver for the growth of the market owing to technological advancements in the industry. Electric vehicles have grown in popularity in recent years due to stricter emissions regulations, greater efficiency, and the introduction of new technologies. Electric cars no longer require a car gearbox. The automotive transmission market is expected to be hampered by the increasing adoption of electric vehicles. Another factor driving the market expansion is growing consumer demand for safe, comfortable rides and seamless gear shifts. The growth of electric vehicles due to rapid urbanization is hindering the growth of the market. The global automotive transmission market is primarily driven by global vehicle manufacturing. Growth in the automotive manufacturing industry is expected to fuel the demand for automotive transmissions in the foreseeable future. In addition, consumer preferences are shifting toward an enjoyable and efficient driving experience. Ultimately consumers expect a car that provides a comfortable driving experience with smooth, easy gear changes. The demand for automotive transmissions is expected to increase owing to technological advancements in automotive transmissions to meet the needs of end users.
