Automotive split seat is a seating system that designs the seat into separate parts, allowing each seat to be adjusted independently, providing greater comfort and space flexibility. Split seats are usually used in the second and third rows of SUVs, MPVs and luxury cars. The independent seats can slide forward and backward, the backrests can be tilted, and they can be folded, flipped or disassembled according to the needs of passengers, making it easy to adjust the interior layout. The split seat layout not only provides more personal space for passengers, but also frees up a wider passage for passengers to enter and exit the vehicle, especially the third row.
