The global Automotive Steering Column Assembly market size is predicted to grow from US\$ 4140 million in 2025 to US\$ 6036 million in 2032; it is expected to grow at a CAGR of 5.6% from 2026 to 2032.

In 2025, global production of automotive steering column assemblies reached 92 million units, with an estimated average selling price of \$46 per unit. The automotive steering column assembly is a safety-critical component installed between the steering wheel and the steering gear (or steering actuator). It serves to transmit the driver's steering torque and angle, support the steering wheel, adjust the driving position, and mitigate driver injury during a collision through collapsible or energy-absorbing structures. It typically consists of upper and lower steering shafts, an outer jacket, an intermediate shaft or universal joint, bearings and bushings, mounting brackets, tilt and telescopic adjustment mechanisms, locking mechanisms, and collision energy-absorbing mechanisms. Key functions include steering torque and angle transmission, driving posture adjustment, steering wheel support and positioning, collision energy absorption, and anti-theft locking, as well as providing mounting interfaces for the steering wheel, airbag clock spring, steering angle sensor, gear shifting and lighting control modules, and other components. The upstream supply chain primarily includes precision steel tubes, high-strength steel plates, aluminum and magnesium alloy castings, bearings, universal joints, spline shafts, stamped parts, engineering plastic bushings, fasteners, springs, and rubber vibration-damping components, along with micro-motors, gears, sensors, ECUs, connectors, and wiring harnesses used in electric adjustment products. The midstream manufacturing stage encompasses steel tube forming, stamping, forging, casting, precision machining, welding, heat treatment, surface coating, and final assembly, as well as validation testing for collision energy absorption, stiffness, durability, clearances, NVH (noise, vibration, and harshness), and functional safety. The

downstream market primarily serves OEMs, covering both passenger and commercial vehicles. The gross profit margin ranges from approximately 15% to 30%.

United States market for Automotive Steering Column Assembly is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Automotive Steering Column Assembly is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Automotive Steering Column Assembly is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
