The automobile steering column and steering drive shaft assembly are the connecting parts installed between the steering wheel and the steering gear. It is mainly used to control the direction of the car, transmit torque, and absorb the energy when the car hits. In order to meet the driver's comfort requirements, the up and down and front and back directions of the steering column can be adjusted. After being installed and connected with the ignition lock, the car's anti-theft lock function can be realized. According to the structure type, the steering column can be divided into: mechanically adjustable tilt angle, electric adjustable lift type, pneumatic adjustable tilt angle, collapse energy absorption type, ordinary type, etc. According to the structure, the steering transmission shaft can be divided into: ball type, nylon coating type, nylon injection type, collapse energy absorption type, etc.
