The global Automotive Synthetic Grease market size is predicted to grow from US\$ 11780 million in 2025 to US\$ 18380 million in 2032; it is expected to grow at a CAGR of 6.7% from 2026 to 2032.

Automotive Synthetic Grease is a lubricating product specially formulated for use in automotive applications. It is made from synthetic base oils and advanced additives that provide superior lubrication, especially in high-temperature and extreme conditions. Automotive synthetic grease is commonly used for wheel bearings, chassis components, and other automotive parts to reduce friction, prevent wear, and extend the lifespan of critical components.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
