The global Automotive Tire market size is predicted to grow from US\$ 141960 million in 2025 to US\$ 177630 million in 2031; it is expected to grow at a CAGR of 3.8% from 2025 to 2031.

Automotive Tire is a ring-shaped component that surrounds a wheel's rim to transfer a vehicle's load from the axle through the wheel to the ground and to provide traction on the surface traveled over. Most tires are pneumatically inflated structures, which also provide a flexible cushion that absorbs shock as the tires rolls over rough features on the surface. Tires provide a footprint that is designed to match the weight of the vehicle with the bearing strength of the surface that it rolls over by providing a bearing pressure that will not deform the surface excessively.

Global key players of automotive tire include Bridgestone, GoodYear, Continental, Michelin, Sumitomo, etc. The top five players hold a share about 57%. Asia Pacific is the largest market, has a share about 36%, followed by Europe and North America, with share 34% and 25%, separately.
