Wiring harnesses and connectors are part of the vehicle wiring system. A wire harness is a group of cables or wires that are fixed together by insulation materials (such as cable sleeves, ties, conduits, or belts). The wiring harness also eliminates any confusion or possible incorrect installation by grouping the wires into a single connection device. The connector is connected to the wire or the wire is passed through the assembly. They are waterproof and heat-resistant, and a hard shell with locking clips secures the two halves of the connector together.
