The global Azo Disperse Dyes market size is predicted to grow from US\$ 426 million in 2025 to US\$ 564 million in 2031; it is expected to grow at a CAGR of 4.8% from 2025 to 2031.

Azo Disperse Dyes are human-made chemicals. They are not expected to occur naturally in the environment. They are used primarily in the dyeing of textiles (mainly synthetic fibres).

The Disperse Dye Market size is forecast to reach around \$9 billion by 2027, after growing at a CAGR of 5.5% during 2022-2027. Disperse dyes are non-ionic dyes, which has low water solubility and exists in water primarily in a highly dispersed state. These dyes are primarily used for dyeing hydrophobic fibers such as polyester, nylon, and acrylic. The major driving factors for disperse dye market are growing consumer demand for color variants in various product categories and growth in end user industries. Surging usage of disperse dyes in the textile industries is expected to impel the global disperse dyes market size. Disperse dyes are also used as a colorant in plastics. The flourishing automotive industry and uses of polyester in various automotive upholstery, further drives the global disperse dyes market share.
