Abstracts

According to this study, the global B2B Payments market size will reach US\$ million by 2031.

B2B payments is a form of electronic payment. It is a real-time payment method provided by a third party through the payment interface with the bank. The advantage of this method is that funds can be transferred directly from the user's bank card to the website account. Customers and merchants can use a variety of electronic payment methods such as credit CARDS, electronic wallets, electronic cheques and electronic cash to pay online, which saves transaction costs.

According to International Telecommunication Union (ITU), the global Internet users (online population) were more than 5 billion. And the number of online shoppers was also increasing. In 2022, the global e-commerce market penetration rate increased to 19.7%, and the e-commerce market reached \$5.5 trillion. At the same time, the Asian e-commerce market ranked at the top of the revenue ranking, which has reached \$1.8 trillion. According to the National Bureau of Statistics, China was the largest online retail market in 2022, with online retail sales of 13.79 trillion yuan and a year-on-year increase of 4%. Among them, the online retail sales of physical goods were 11.96 trillion yuan, with a year-on-year increase of 6.2%, which accounted for 27.2% of the total retail sales of consumer goods.
